

First Bank of Manhattan supports the *MyCardRules* App for your debit card spending controls and alerts. You can download the *MyCardRules* App from Google Play™ or the App Store® and install on multiple mobile devices.

A variety of controls and alerts are available on all supported cards including:

- Turn the card on and off
- Set per-transaction spending limits based on various factors such as dollar amount, transaction type, or merchant type
- Receive alerts on all transaction attempts declined
- Set other instant alerts on all or select transactions
- Set a location boundary where the card can be used based on map region or device geolocation
- Set parental or employer controls and monitoring

Alerts are sent as native push notifications through the device operating system.

*MyCardRules* adds an effective layer of fraud detection and prevention, and gives cardholders the assurance that they have set up the rules and alerts they desire. The ability to shut down card activity when not in use or in the case of suspected fraud provides cardholder peace of mind and increases awareness.
